**Subject:** Re: DRMS materials delivered to Gladstone

Matt, Steve and I discussed this. We are going to leave the stuff in Gladstone, probably need to be moved to a better location for the winter. These materials might be useful deeper in Gold King level #7 or at the Mogul.

Allen,

It appears that EPA will not use the materials delivered from the Carbanero site. If we have used some of the material we can purchase that . At this time, we need to plan on transporting this material to a location of your choosing.

Please let Matt and me know where you would like the shipment directed and we'll let you know when the shipment is scheduled.

I greatly appreciate your making these materials available during the initial phases of the response. Should the conditions have changed rapidly, we would have been able to use these supplies quickly.

Thanks you,

Steve

**Subject:** DRMS materials delivered to Gladstone

The following numbers for consideration of whether Reams Construction will bill EPA/ERRS directly, or work it through DRMS.

12 steel sets at \$3808 each = \$45,696

3 E-1 pre-cast panels delivered to Gladstone, \$6000 (approx., still have to confirm w/ Reams). No cost for panels included. These were out of DRMS stock.

Delivery of steel sets to Gladstone, \$1500 (approx., still have to confirm w/ Reams)

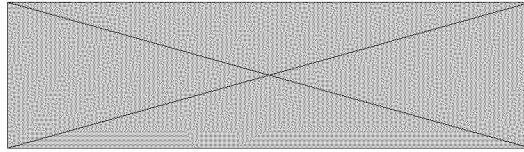

Approximate TOTAL, \$53,196
